

NCS GLOSSY INDEX 1950 Original

A high-end glossy fan deck based on NCS, with an easy, practical and intuitive overview of the entire range of 1,950 NCS Original colours, each with a unique glossy finish - including the 200 new light colours introduced in 2004. The colours in the NCS Glossy Index are divided into five different groups: grey, yellow (G80Y-Y70R), red (Y80R-R70B), blue (R80B-B70G) and green (B80G-G70Y). With NCS Glossy the user can illustrate demands more clearly when working with glossed colours and surfaces, control the use and selection of colour more effectively and communicate their requirements better. Used separately, or in conjunction with the semi-matt NCS colour samples, NCS Glossy opens up a whole new level of colour understanding.

Specifications:

Colours:	1 950 stripe coated standard NCS colours. 55 of the colours are repeated
No. of pages:	216 pages
